Profile

Software Engineer | MERN Stack & Cloud Developer experienced in building high-performance React.js frontends and scalable Node.js/Express.js backends with MongoDB. Skilled in full-stack applications with secure authentication, RESTful APIs, dashboards, and AI-driven features. Developed AI-powered expense trackers and cloud systems using AWS S3 and SES. Focused on performance, scalability, and maintainable architecture.

Skills

Frontend

React.js, JavaScript (ES6+), Tailwind CSS

● ● ● ● ●

Backend

Node.js, Express.js, RESTful APIs, JWT Auth.

● ● ● ● ●

Database

MongoDB, Mongoose

● ● ● ● ●

Cloud & Deployment

AWS S3, AWS SES, Serverless Architecture

● ● ● ● ●

Tools & Development Practices

VS Code, Git/GitHub, Postman

● ● ● ● ●

Soft Skills

Problem-solving, Team Collaboration

● ● ● ● ●

Professional Experience

05/2024 – 06/2025

AgroConnect – Final Year Project

Academic Project

- Developed a responsive React.js frontend for 200+ farmers and customers, improving usability and engagement by 30%
- Integrated AI crop disease detection, medicine suggestions, and real-time weather updates, reducing crop loss risk 20%

08/2025 – 09/2025

AI Expense Tracker

Remote Project

- Built React.js frontend with dashboards for tracking 500+ monthly spending trends
- Node.js/Express backend with CRUD, JWT auth, and AI insights, reducing overspending 15%

10/2025 – 11/2025

Real Estate Backend System

Remote Backend Project

- RESTful APIs for 1000+ listings with secure authentication, improving reliability
- Integrated Google Maps and managed AWS S3/SES, cutting media retrieval time 25%

Education

11/2021 – 06/2025

Gujrat, Pakistan

BS Software Engineering

University of Gujrat

- Relevant Coursework: Data Structures & Algorithms, Web Development, Database Systems, Software Project Management
- Highlights: Developed an AI-driven platform connecting farmers and consumers with actionable crop insights
